

Academic Preparation for Clinical Education

DPT 6720 PT Practice II and DPT 6820 PT Practice III (23-week terminal internship)

Prior to the terminal internship, students have completed all didactic courses with the exception of DPT 6711 Primary Care PT, DPT 6811 Business Management and Entrepreneurship, and DPT 6831 Capstone Presentation and Examination. These courses are completed in conjunction with their terminal clinical experience.

Terminal internship is designed to prepare the student for entry-level practice as a generalist physical therapist. Working alongside clinical faculty who have attained specialty board-certification also prepares students for a future transition into post-graduate residency training if desired.
