Indicators Used

INDICATOR	DESCRIPTION AND HOW IT WAS CALCULATED
Retention Rate	[1 - (number of students who dropped from the program between July 2019 and June 2020)] divided by number of unique students enrolled in the program between July 2019 and June 2020)
Graduation Rate	Graduation rate is based on students meeting programmatic admissions requirements completing their degree within 150% of the expected time to graduation. This is 3 years for AS students, 6 years for BBA students, and 2 years for MBA students. Calculation is then number of students who graduated divided by the number of students who began and were admitted to program in 2016-2017 for Associate level programs, 2014-2015 for Bachelor's level program, and 2017-2018 for MBA program. Declared students not meeting programmatic admissions requirements are not included.
